Subject: RE: [EXT] Fw: December 17, 2020: Request for Semi-Annual Perimeter Groundwater Assessment at BASF NW_ April 1 2021 reply date

Art, BASF has reviewed the Remedial Design Work Plan (RDWP) work scope, and this request appears to duplicate part of the approved RDWP effort that is now underway. BASF respectfully requests that the EGLE proposal be discussed at the next (May 6th) RDWP Stakeholder update meeting. This meeting will be held before the next CD sampling event scheduled for June so there would be time to coordinate efforts before then, as appropriate. I will have Arcadis distribute before the meeting any slides or other information regarding specific well locations, construction details, etc. that will be discussed.

Thank you Art,

Mike

Subject: Fw: [EXT] Fw: December 17, 2020: Request for Semi-Annual Perimeter Groundwater Assessment at BASF NW_ April 1 2021 reply date

Mike,
Please let me know where the Dec 12 request for perimeter monitoring at BASF NW stands, and when we can expect a reply.

"....will respond to EGLE with any questions, comments, or proposed alternative locations by April 1. "

thanks,
Art

Art, thank you for reaching out to me yesterday. As we discussed, BASF is actively evaluating the request to add the 16 perimeter wells to the June 2021 CD sampling event and will respond to EGLE with any questions, comments, or proposed alternative locations by April 1.

Subject: [EXT] Fw: December 17, 2020: Request for Semi-Annual Perimeter Groundwater Assessment as part of 1986 State of Michigan Consent Decree Monitoring

Mike,
EGLE had asked for a reply to our request for Perimeter GW assessment by Feb 01.
Can you let me know the timeframe to expect a response to our letter?
Thanks,
Art

Regular perimeter data would help verify the integrity of the 1985 CD with the SOM, as well as the United States Environmental Protection Agency (U.S. EPA), Docket V-W-011-94. This request aligns with the shift in Groundwater Corrective Action Studies under RCRA under U.S. EPA lead, while still operating the extraction well fields as the primary remedial measure for the foreseeable future under the SOM CD.

A confirmation of inclusion of perimeter sampling at BASF NorthWorks, with PFAS, is requested by February 01, 2021.

Subject: December 17, 2020: Request for Semi-Annual Perimeter Groundwater Assessment as part of 1986 State of Michigan Consent Decree Monitoring

Dear Mr. Gerdenich:

The subject document is attached on behalf of the state of Michigan, Department of Environment, Great Lakes, and Energy (EGLE), Materials Management Division (MMD). A copy will follow, via United States Postal Service.

If you have any questions, please contact Mr. Arthur Ostaszewski, Environmental Quality Specialist, Permit and Corrective Action Unit, Hazardous Waste Section, MMD, 517-936-7991; OstaszewskiA@Michigan.gov; or EGLE, MMD, P.O. Box 30241, Lansing, Michigan 48909-7741.

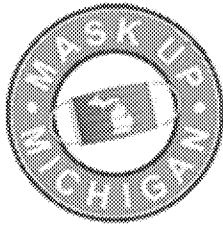

Sincerely,
Vickie Terry
